

ABSTRACT OF THE DISCLOSURE

A collapsible roof assembly for a boat or other base structure where there is a roof structure mounted by a collapsible frame.

- 5 The frame has right and left portions, each having front, intermediate and rear strut sections connected between the roof structure and the boat. The front struts can be disconnected and permit the roof structure to be rotated with its rear portion being lowered to a position where it is braced relative to the intermediate
- 10 struts. Then the roof structure is moved forwardly and downwardly to it's collapsed position.
